SUMMARY

B.Tech Computer Science (AI & ML) candidate with an 8.37 CGPA. Technical specialist with practical experience in Python, SQL, and AI system design. Proven skills in creating real-time monitoring solutions using YOLO-based object detection and OCR technology. Demonstrated ability to work within the software development lifecycle (SDLC) during a corporate Android development internship. Committed to delivering scalable software and integrating AI models into structured database environments.

SKILLS

- **Programming:** Python, C, Java, SQL
- **AI & Computer Vision:** YOLO, OCR, Image Processing, Computer Vision, Generative AI
- **Web & UI/UX:** HTML, CSS, Figma (Prototyping)
- **Tools & Systems:** Git (Version Control), Linux, DBMS (MySQL/SQLite), System Integration
- **Core Concepts:** SDLC (Software Development Lifecycle), Real-Time Monitoring Systems, Database Logging, Prompt Engineering

PROJECTS

Autonomous Campus Fleet Management

- Developed a real-time gate monitoring system using live camera feeds for automated vehicle logging.
- Implemented a YOLO-based object detection model to identify college transport vehicles.
- Integrated OCR technology to extract license numbers into a structured SQL database.
- Engineered rule-based logic to generate automated entry/exit reports and identify delays

Picto Pro

- Created Generative AI Software for Text-to-Video and Image-to-Video generation.
- Tailored the system for educators, allowing the production of quality videos through text inputs.
- Simplified processes using AI powered by Python for multimedia production automation.

EduPathway: Integrated Career Guidance Platform

- Designed a counseling platform to assist students in navigating educational and career trajectories.
- Built an intuitive UI using Figma and web technologies to map user-interest milestones.

INTERNSHIP EXPERIENCE

Android Application Development Intern | GRAPESGENIX Technical Solutions Pvt. Ltd May 2023

- Assisted in the development and testing of Android applications using Java and XML-based UI design.
-

-
- Debugged application logic and improved feature reliability through structured unit testing and system troubleshooting.
 - Collaborated in a team-based environment using version control (Git) and task tracking to meet project milestones.
 - Gained exposure to the full Software Development Life Cycle (SDLC), deployment workflows, and professional documentation standards.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) | 2024 – Present Nehru College of Engineering and Research Centre, Thrissur (Affiliated to APJ Abdul Kalam Technological University)

- CGPA: 8.37/10.0 (Current – 7th Semester)

Diploma in Computer Engineering | 2022 – 2024 - St. Mary's Polytechnic College, Valliyode (State Board of Technical Education)

- CGPA: 9.32/10.0

Higher Secondary (Plus Two) | 2021 – 2022 S M High School, Ayalur (Directorate of Higher Secondary Education)

- Grade: 85%

CERTIFICATIONS

- **Prompt Engineering & Applied AI** – Dubai Future Foundation (2025)
- **Artificial Intelligence** – Infosys Springboard (2025)
- **Generative AI for All** – Infosys Springboard (2025)
- **Career Edge: Young Professional** – TCS iON (2024)
